

Let's set the scene in the 1920's. As prohibition forced the bar and club scene in to hiding, the speakeasy was born and became a part of the vernacular faced with constant raids from law enforcement. Pop culture and slang changed to include many words to describe and alert others about cops. Fortunately our 20's are a little different. This place may be a little similar but you need not fear of being raided by the police. Now you have found us, just sit back, relax and enjoy some great food, drinks and good times. Welcome to Victoria Lane.
